

ArChine Foodramic BEB 1200

NSF Registration No.150932

Description

ArChine Foodramic BEB 1200 is a fully synthetic, metal-free universal paste which has been formulated for demanding applications in food industries. The combination of fully synthetic base oil, a mature additive technology and super fine high temperature resistant powder has produced a high-performance paste for universal use.

Properties

- USDA / NSF H1 Approved
- Prevents seizing and cold welding
- Prevents stick-slip behavior even for high surface pressures
- Very stable in the presence of hot and cold water as well as most acids and alkalis
- Does not attack any known sealing materials
- High temperature protection with rotating and sliding component in various kind of industrial furnace
- Very high load-carrying capacity
- Prevents brake noise
- Non-toxic

Technical Data

| | |
|-----------------------------|--------------------------|
| Appearance | White, smooth paste |
| Operating temperature range | approx. - 30°C ~ 1200 °C |

Application

ArChine Foodramic BEB 1200 is used for lubricating all types of high-load sliding surfaces. Used especially for low slide speeds and/or oscillating movements and for screw, plug-in and bayonet connectors made from steel and non-ferrous

metals. Separation of components subject to heat stress, such as internal combustion engines, turbines and motor vehicle brake systems. Corrosion protection of bolts,

pins, studs, flanges, spindles and bottom pockets in refineries, steel and cement works as well as shipping and agricultural engineering. And most of high temperature protection of rotating and sliding in various kind of industrial furnace. Especially in hot melting drilling facility.

Instructions

Before treating with **ArChine Foodramic BEB 1200**, all components must be clean and free from residues, dirt and moisture. Apply to cleaned surfaces using a brush or lint-free cloth. Apply the amount which is appropriate for the application
