

**ArChine Synchain KHY 300****Fully synthetic high temperature chain lubricants****DESCRIPTION**

ArChine Synchain KHY 300 product is synthetic POE high temperature lubricants designed primarily for high temperature equipment, such as oven chains and tenter frame ovens, as well as paint and ceramic curing ovens. Satisfactory performance can also be expected in applications involving bearing lubrication. Formulated from a quality synthetic base stock and additive system, ArChine Synchain KHY 300 provides the following performance benefits.

- Excellent high temperature oxidation and thermal stability for prolonged lubricant life
- Extremely low volatility resulting in less oil consumption
- Superior antiwear properties for reduced chain drag
- Does not form carbon residue as petroleum products do
- Maintain a clean operating environment for frame rails and chains

**TYPICAL PROPERTIES**

Appearance	Yellow
Viscosity @40°C, cSt	308.51
Viscosity @100°C, cSt	38.39
Viscosity index	176
Density@ 20°C, g/cm <sup>3</sup>	0.962
Flash point, °C	302
Fire point, °C	326
Pour point, °C	-27
Copper corrosion, 3h/100°C	1

These technical data are based on average test results. Minor deviations may occur from case to case.
