

ArChine Foodrance WCC 1

Specific Grease for Food-contact for Granules Press Machines

NSF Registration No. : 145479

Place of Origin: France

| | | | |
|-----------------------------------|-------------|-----------|----------------------|
| Color | | | Beige to light beige |
| Texture appearance | | | Smooth/Adhesive |
| Nature of base oil | | | White oil |
| Nature of thickener | | | Calcium Complex |
| NLGI Grade | | | 1,5 |
| Dropping point | METTLER | °C | ≥260 |
| Penetration worked 60 strokes | ISO 2137 | 0.1 mm | 295-340 |
| Penetration worked 10,000 strokes | ISO 2137 | 0.1 mm | 350-360 |
| Wearing four-ball Shell | ISO 20623 | mm | 0.42 |
| Welding four-ball Shell | ASTM D 2596 | kg | 400 |
| Copper corrosion | ASTM D 4048 | Quotation | 1 b |
| Roller test (A penetration) | NF T 60-190 | A | 13 |
| Wheel bearing | ASTM D 1263 | gr | 4 |
| Temperature of use | | °C | -20 to 150 |
| Water Wash Out | ASTM D 1264 | % | 1 |

PROPERTIES

- Very adhesive (anti-ejection) for high speed of rotation.
- Very high resistance to pressures loads and chocks.
- High lubrication performance thanks to the addition of high viscosity synthetic base.
- Anti-wear performance reinforced.
- Totally insoluble in presence of water and vapor.
- High thermal and mechanical stabilities (high dropping point).
- Consistance adapted for all automatic or semi-automatic greasing systems.
- NSF H1, Halal and Kosher approved.

ARCHINE

Shanghai PingYiao Trading CO., Ltd.

ArChine Foodrance WCC 1 is particularly appropriated for food-processing industries and for lubrication relatively severe and diversified:

- Bearings or simple wheels or double-line rollers heavily loaded for granules press machines used for pet food transformation.

ArChine Foodrance WCC 1 is particularly recommended for compress wheels greasing on main granules press machines or palletizing mills.

This grease also is suitable for:

- Plain bearings which work continuously and subject to vibrations or repeated chocks.
- Articulations, chains, varied movements in aqueous or semi-immersed environments (canning factories, pet food transformation, fish industries, etc.)
- Sliding channels and cams in the food-processing industries.
- Open gears or not waterproof gearboxes working on bottling, packaging and packing chains.
